I'm currently interning as a Web Developer at Life Choices Studio, where I'm upskilling in languages such as HTML, CSS and JavaScript. I am also completing my Cisco Networking learning journey through LC Studio. With previous training at institutions like Codetelligence Academy and Project Codex, I'm building a strong understanding of both front-end and back-end development. Eager to apply my skills and continue learning in the ever-evolving field of web development. Looking forward to exploring opportunities to contribute and grow

OUR CODING PROGRAM

A comprehensive 12-month full-stack web development and work-integrated training program.

Our 6-month coding program equips youth in full-stack web dev via instructor-led modules/projects, soft skills training, and psychosocial support.

LC STUDIO
Coding the Future

LC Studio offers an additional 6-month work-integrated learning experience focusing on tailored learning journeys whilst simulating the work environment.

PARTNERSHIP PROGRAM

Our partnership initiative aims to collaborate with companies keen on hosting interns who have the potential to transition into permanent roles. These companies recognise the importance of fostering a secure environment for budding developers to flourish.

Our partnership program consists of the following key points:

- ▶ Internship model, support and outcomes
- ▶ Internship hosting requirements
- ▶ Our stipend program
- ▶ Targeted outcomes

OUR STIPEND PROGRAM

Financial support through stipends is crucial for our interns to remain in the program and meet their basic needs. Via our Yes4Youth partnership, interns receive monthly stipends. **Placement partners acknowledge and support the following:**

TOP UPS

Consider providing a top-up amount to interns, as the stipend may not cover all expenses. This supports their thriving in the internship.

CONTRACTURAL TRANSITIONS

Support the transition from internship to employment within timeframes required by Yes4Youth partner. This can be negotiated upfront.

DOCUMENTATION

Ensure internship/employment documents reflect key details. Provide supporting docs including contracts for sharing with Yes4Youth.
